OpenSystems

Smarter Systems Start with Smarter Thinking

Catalyx OpenSystems, powered by OLOS, connects and controls the operations behind today's most advanced life sciences, consumer goods, and logistics environments. OLOS is the intelligent core—unifying machine vision, automation, and data control within an open, modular architecture designed to scale as your needs evolve. Rather than rely on one-size-fits-all AI or inflexible integration, we take a problem-first approach. Our experts apply the right mix of proven technologies and intelligent tools—ensuring every solution is reliable, compliant, and built for real-world performance.

Enable seamless compliance with 21 CFR Part 11, EU Annex 11, GAMP 5 and global GMP standards

Scale effortlessly from single-site to enterprise - wide deployment

Accelerate audits, validation, and traceability with built-in compliance frameworks

20%+

Reduce unplanned downtime by 20%+ through real-time process visibility

25%

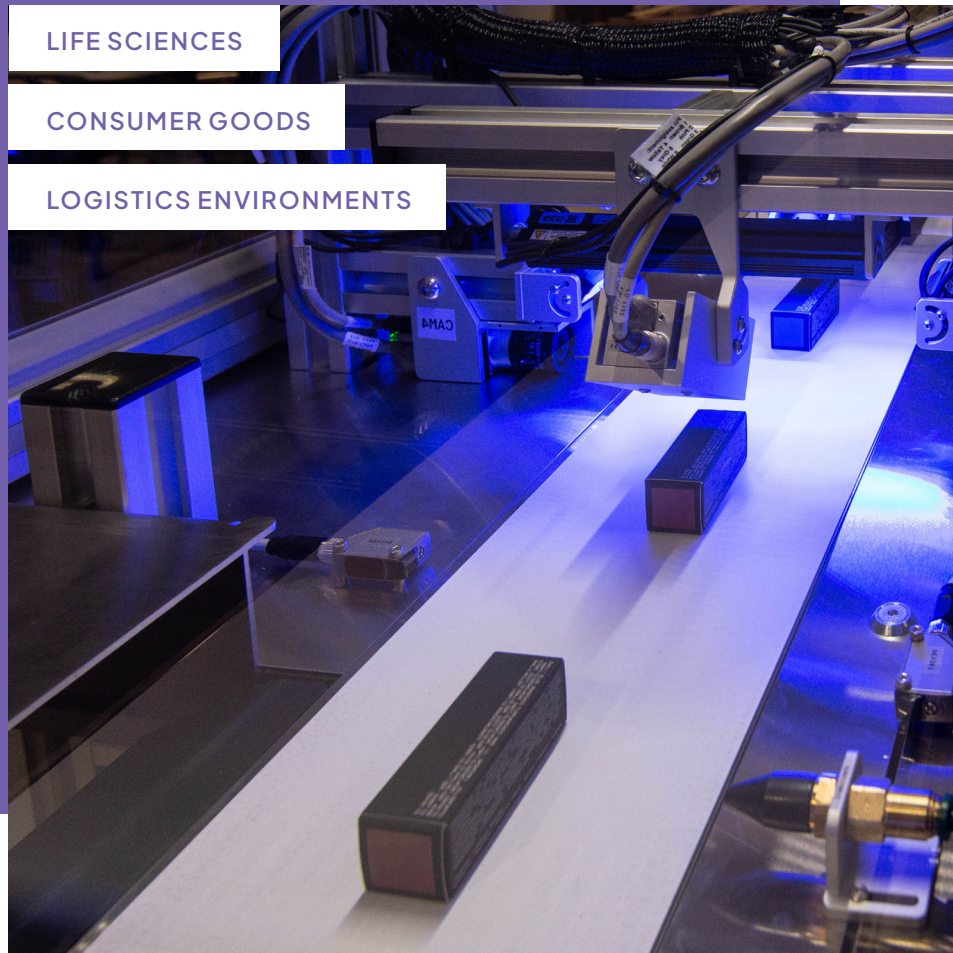

Lower operational costs by up to 25% with automated workflows and reduced manual effort

Proven
at Scale

1,567% Increase in Medical Device Production

A global leader in biometric monitoring scaled from 3M to 50M units/year with Catalyx OpenSystems - achieving full traceability, round-the-clock uptime, and life-changing impact for 1.5 million patients daily.

The Catalyx Advantage

Modular, Open Architecture:
Adaptable to both legacy and next-generation environments for rapid deployment and seamless integration.

Cloud-Connected, Edge-Aware:
Real-time data synchronization from production lines to the cloud for instant visibility and action.

Local Reach, Global Presence: Catalyx supports manufacturers worldwide, delivering regional expertise with truly global implementation.

30 Years of Proven Experience: Decades of innovation in automation, compliance, and process excellence—trusted by leading regulated industries.

**Take the First Step
Toward Connected,
Compliant Manufacturing.**
